## TIPS FOR SAVING MONEY ON...YOUR LOCAL RESIDENTIAL RELOCATION

Time is money! How much you save depends on your organization and preparatory planning. Please take time to review our moving tips and important information that will curtail your EXPENSE and also reduce some of the STRESS.

- Save time and money by labeling/coding your rooms with a furniture layout and attach to your entrance doorway with masking tape (removable).
- Pack all non-breakable items yourself. Pack smaller, light cartons into large cartons (consolidate).
- Andrews can provide recycled wardrobe cartons on the day of the move for your packing convenience.
- Remove and stage all cartons/items from over garage, crawl spaces and even exterior storage buildings to a centralized staging area.
- Sort all perishables, flammables, acids, poisons, yard chemicals, cleaning solutions (bleach) and propane tanks. Please be cautious not to pack any of these items to be transported by the carrier.
- Disconnect your own audio wiring system, cable TV, VCR, DVD players, personal computers and any other electronic equipment. Don't forget to code your wires/outlets on any electric equipment.
- We suggest you move lamp/shades, wall hanging and small pictures. If the mover has to perform this service, it will result in additional time and material.
- Movers will protect your doorframes and railings, but if you anticipate any clearance problems, please remove obstacles to save time and money in advance.
- Any hardware, extension cords, pieces and parts should be placed in a plastic bag for safe keeping (particularly bookcase shelf clips).
- Disassemble your bed framing. If you have a waterbed, completely drain the mattress in advance. Any special assistance required, please discuss the preparation with your moving consultant.
- To avoid delays on your relocation day, consult your mover about any servicing assistance you may require for the following items: Special servicing required...washer/electric dryer, gas dryer, icemaker, grandfather clock, waterbeds, hot tubs, piano, and outdoor play equipment. Andrews can recommend qualified service technicians. Please have refrigerator cleaned and emptied on moving day.
- Keep main passageways clear for easy movement. **WINTER WEATHER:** Arrange for walkways and driveways to be shoveled and/or plowed for safe access to our van before your mover arrives.
- Advise your mover in advance if any changes in volume to relocate occur from the original estimate. Surprise increases in volume equal increased costs to you!

We want you to feel confident about employing Andrews Moving and Storage Company. These suggestions, along with informational points, will give you the opportunity to make your relocation as **economical** as possible. **We wish you much happiness and success!** Thank you.
